

Supplemental Figure 1

Fig S1. Performance evaluation of miRNA and combined mi/piRNA signature on DCN cohort. **A.** AUC of 0.70 was obtained when the miRNAs signature is evaluated on DCN cohort suggesting decent predictive abilities from mciStable to mciAD. **B.** AUC of 0.62 was obtained when the sncRNAs signature is evaluated on DCN cohort suggesting poor predictive abilities from mciStable to mciAD. **C.** AUC of 0.59 was obtained when pTau and Ab42/40 ratio was used to predict conversion of mciStable to mciAD.
